EDUCATION

Scrimba (Frontend Career Path)

12/2023 - Present

An online bootcamp in web development aimed at acquiring fundamental skills for becoming a frontend developer engineer. Enriched with extra modules, guides, and practical learning through personal projects and reference materials.

Anton Bruckner Privatuniversität (AT)

10/2014 - 03/2020

Courses of jazz music (drums as main field) while also gaining experience in the technological aspects of music/video production and sound engineering.

ABOUT ME

As a self-motivated learner, I thrive on translating imaginative concepts into practical and captivating applications. My skill set encompasses React, NextJS, Typescript, Tailwind CSS, Astro, SASS, and more, all while adhering to industry-leading practices in UX/UI design. I take pride in delivering clean, contemporary, and easily comprehensible code. With previous experience in e-commerce and proficiency in no-code/low-code platforms such as Webflow and Wordpress, I offer a well-rounded background. These diverse experiences have shaped me into a versatile individual with a passion for innovation and an insatiable appetite for ongoing growth. I'm enthusiastic about bringing this diverse skill set to your team and contributing to our collective success.

WORK EXPERIENCE

Frontend developer — July 2024 - Present

Česko.Digital, Unreleased.art

I specialize in developing user-friendly, interactive web interfaces based on Figma designs. My work spans various projects, such as the Volební kalkulačka for Česko.Digital and the social platform for musicians, unreleased.art. These projects involve building dynamic, responsive interfaces using modern technologies like React, TypeScript, Tailwind CSS, Astro, and Next.js.

Part-time music school teacher & IT consultant — 2021 - Present

ZUŠ Frenštát p. Radhoštěm

In addition to my music teaching responsibilities, I've developed a ticket reservation system (WordPress) and initiated various digital enhancements within the organization. I also engaged in occasional sound engineering tasks.

Freelance no-code development — 2021 - 2023

Various clients

Developing a keen interest in web development in my free time, I've delved into designing and launching websites utilizing no-code tools, primarily Webflow and Wordpress. This experience has sparked my curiosity in frontend development, driving me to explore and learn more in this field.

Selected projects: chiradamcik.cz, vladimirjavorsky.cz, marabell.cz

Digital marketing & freelance musician — 2020 - present

Mamtex.cz, various music projects

Working part-time as a digital marketer with a hands-on approach to technical aspects (e-mail automation, HTML/CSS modifications) in e-commerce, while simultaneously achieving international recognition as a successful and award-winning jazz musician (Anděl Awards winner and many others).
